

Sierra Community
College District

**Sierra College Associate Degree Nursing Program
Student Nurse Handbook
Acknowledgement**

Accountability is a key word in the discipline and profession of nursing. The materials in the Sierra College Student Nurse Handbook contain the philosophy, policies, procedures, and general information which facilitates each student's success in the program. Students are expected to be accountable and responsible for understanding the content of the handbook.

The faculty, administration, and program staff collaboratively reserve the privilege of revising the policies and procedures found in the Student Nurse Handbook at any time deemed advisable. Any revisions will be made in writing and effective as of the date on the revision. Students are notified of revisions using District standard communication methods. Students are expected to review and be accountable to the revisions at the time of posting. You will be responsible for adding, changing or replacing pages of the handbook as directed by faculty, administration and/or program staff.

I have received, reviewed and sought clarification regarding the Sierra College Associate Degree Student Nurse Handbook. I understand that revisions may be made when deemed advisable and when there are changes in regulation and/or health care policy. I understand that I am responsible for, and accountable to, revisions of this handbook.

This acknowledgement will be placed in my student file in the Nursing Department.
