<tr>
<td>What does the department think it can do to improve teaching and learning?</td>
<td>Expand online resources. Students frequently turn to online help such as YouTube and websites. However, they are of varying quality. Instructors should help curate content and provide their own.</td>
</tr>
<tr>
<td>What help or resources are needed from the college to improve teaching and learning?</td>
<td>While we all know we need to offer more online content, the bottleneck is time and technical expertise. Students expect to have online content available. Yet we all run our courses in little bubbles, isolated from each other. The college should consider incorporating online content into evaluations and make available training and technical resources to produce them. How about 4-8 paid hours to work with a designer and technician to produce a few videos and quizzes? Need more classroom space for expanding curriculum.</td>
</tr>
<tr>
<td>What are top priorities for improvement?</td>
<td>Many of our instructors are regularly producing online content. While this remains a priority, we also need to focus on getting classroom and lab space.</td>
</tr>
<tr>
<td>How will department implement those priorities?</td>
<td>Work with division office to identify additional rooms.</td>
