

# Find the track!

Wherever animals go they can leave signs that they were there. Those signs can be tracks, scat (this is the scientific name for what is left after an animal goes to the bathroom) or the remains of a meal.

**ACTIVITY:** Help the deer find his favorite snack, acorns!  
Start by following his tracks, then finish the maze.

Go for a walk with an adult. Find a track. Try to figure out what animal made that track. Take a picture! You can start your own track collection.
